

SPOTIFY DATASET ANALYSIS

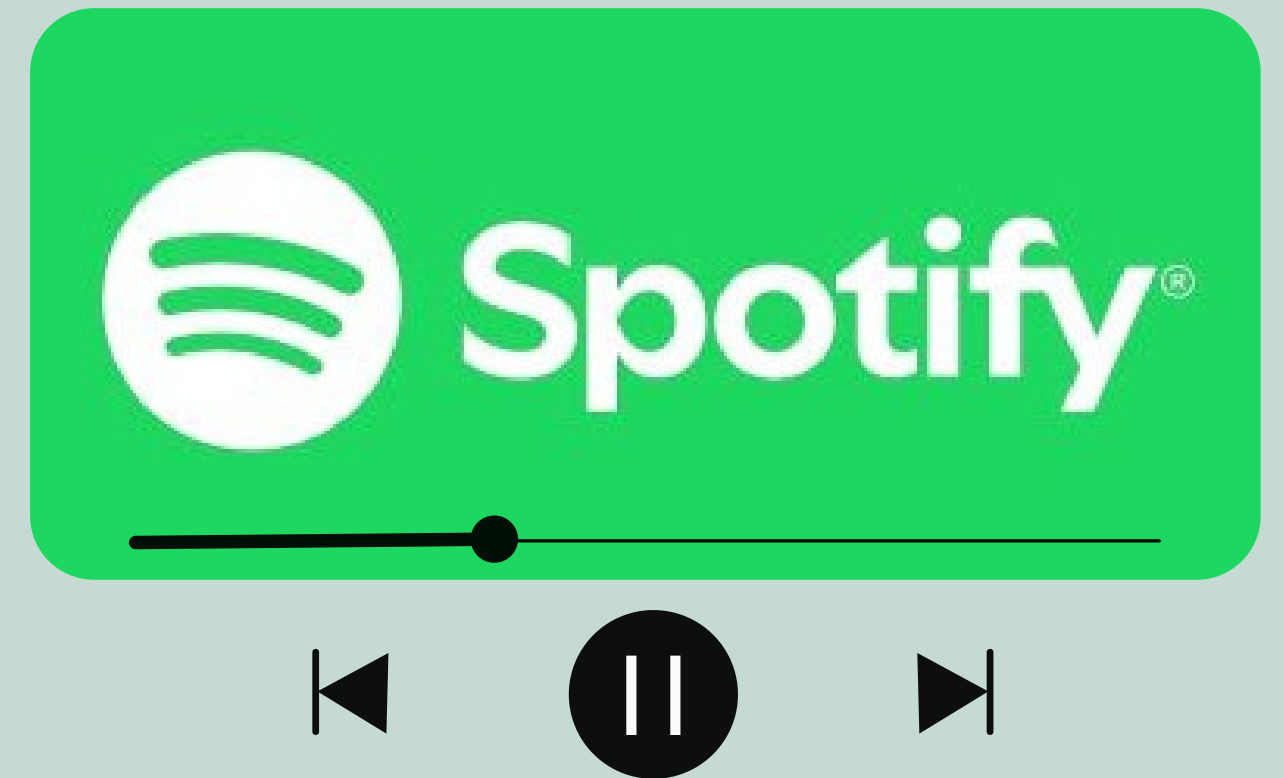

ADVITIYA AEKULA

PROJECT OVERVIEW

The dataset consists of over 8000 rows and 12 columns which include subscription_type, listening_time, skip_rate etc. It focuses on understanding User Retention and Engagement.

The dashboard provides a comprehensive view of Spotify's User Retention and Engagement metrics.

DATASET

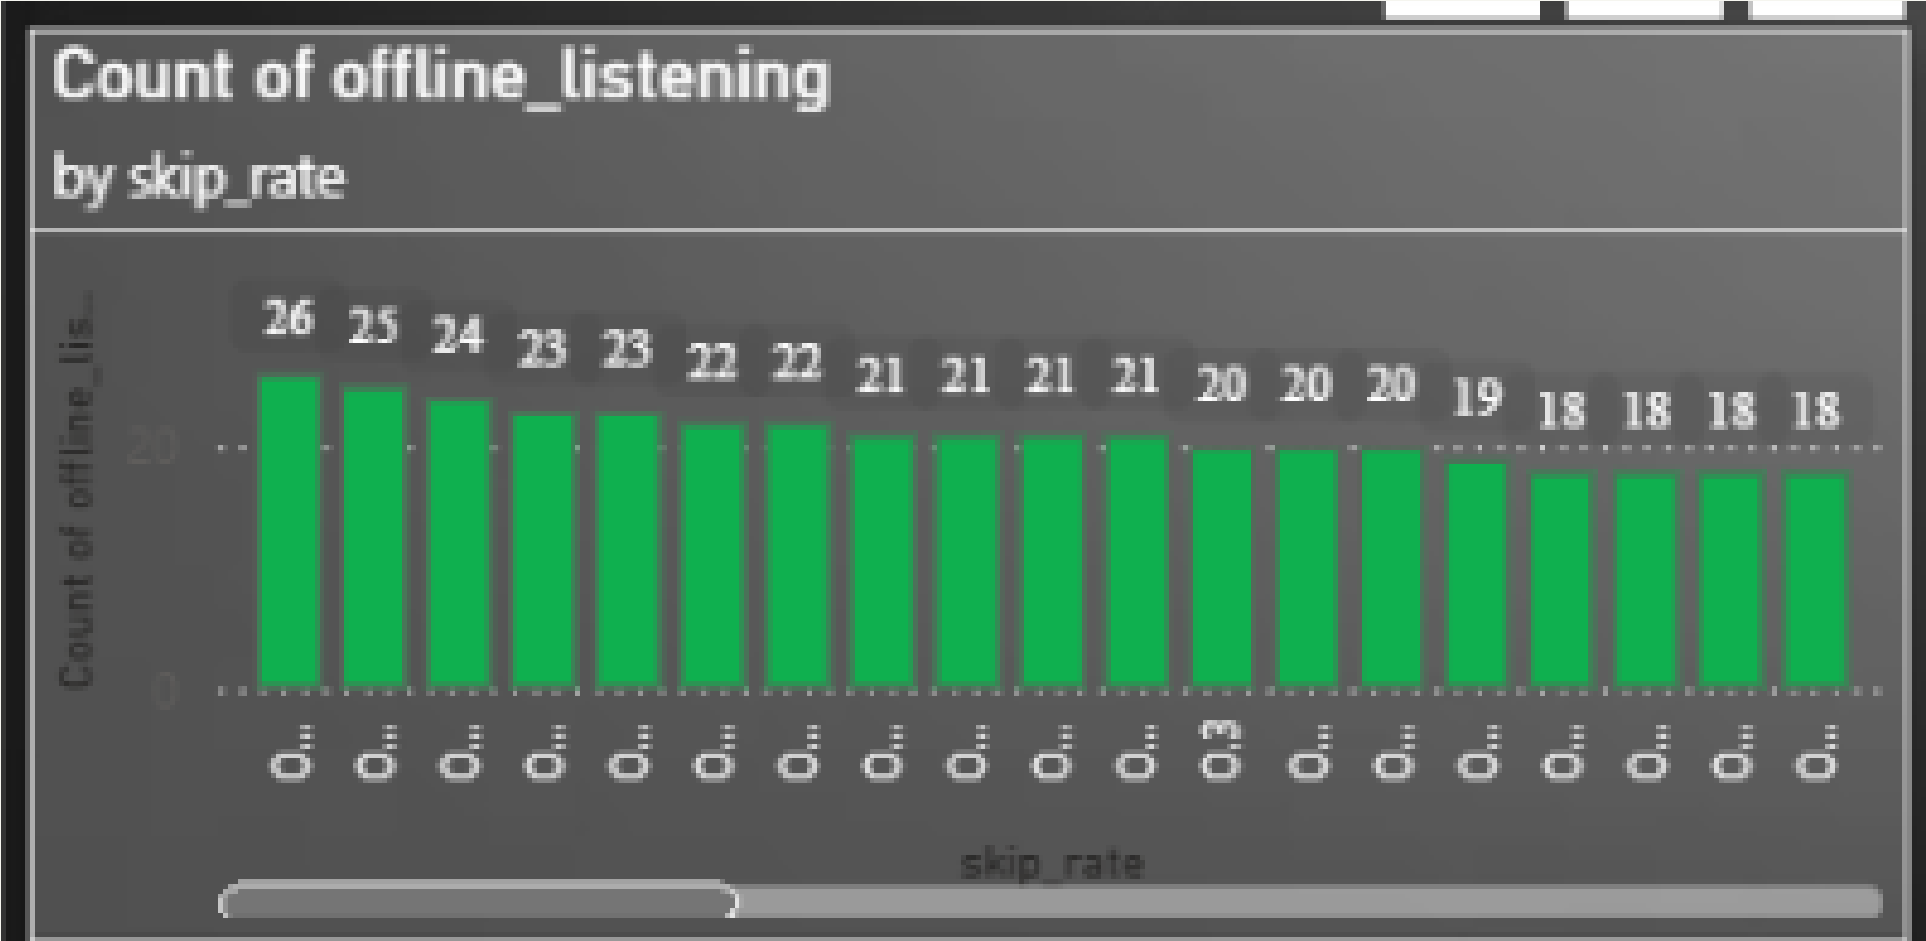

Write a DAX expression to create a new table.

user_id	gender	age	country	subscription_type	listening_time	songs_played_per_day	skip_rate	device_type	ads_listened_per_week	offline_listening	is_churned
22	Male	49	AU	Premium	20	7	0.45	Desktop	0	1	
76	Male	25	UK	Premium	111	83	0.19	Desktop	0	1	
150	Male	34	FR	Premium	278	83	0.24	Desktop	0	1	
151	Male	44	AU	Premium	251	57	0.37	Desktop	0	1	
183	Male	58	CA	Premium	281	58	0.16	Desktop	0	1	
213	Male	37	CA	Premium	139	71	0.16	Desktop	0	1	
246	Male	48	IN	Premium	178	70	0.29	Desktop	0	1	
293	Male	51	US	Premium	235	5	0.28	Desktop	0	1	
297	Male	34	DE	Premium	293	30	0.16	Desktop	0	1	
337	Male	59	UK	Premium	93	36	0.39	Desktop	0	1	
358	Male	22	PK	Premium	229	70	0.02	Desktop	0	1	
418	Male	42	UK	Premium	23	66	0.49	Desktop	0	1	
426	Male	43	DE	Premium	170	73	0.48	Desktop	0	1	
450	Male	41	US	Premium	166	86	0.03	Desktop	0	1	
454	Male	19	IN	Premium	188	15	0.27	Desktop	0	1	
478	Male	31	PK	Premium	65	7	0.04	Desktop	0	1	
519	Male	21	AU	Premium	164	90	0.55	Desktop	0	1	
535	Male	38	UK	Premium	137	38	0.02	Desktop	0	1	
592	Male	58	UK	Premium	178	98	0.43	Desktop	0	1	
695	Male	21	CA	Premium	199	85	0.19	Desktop	0	1	

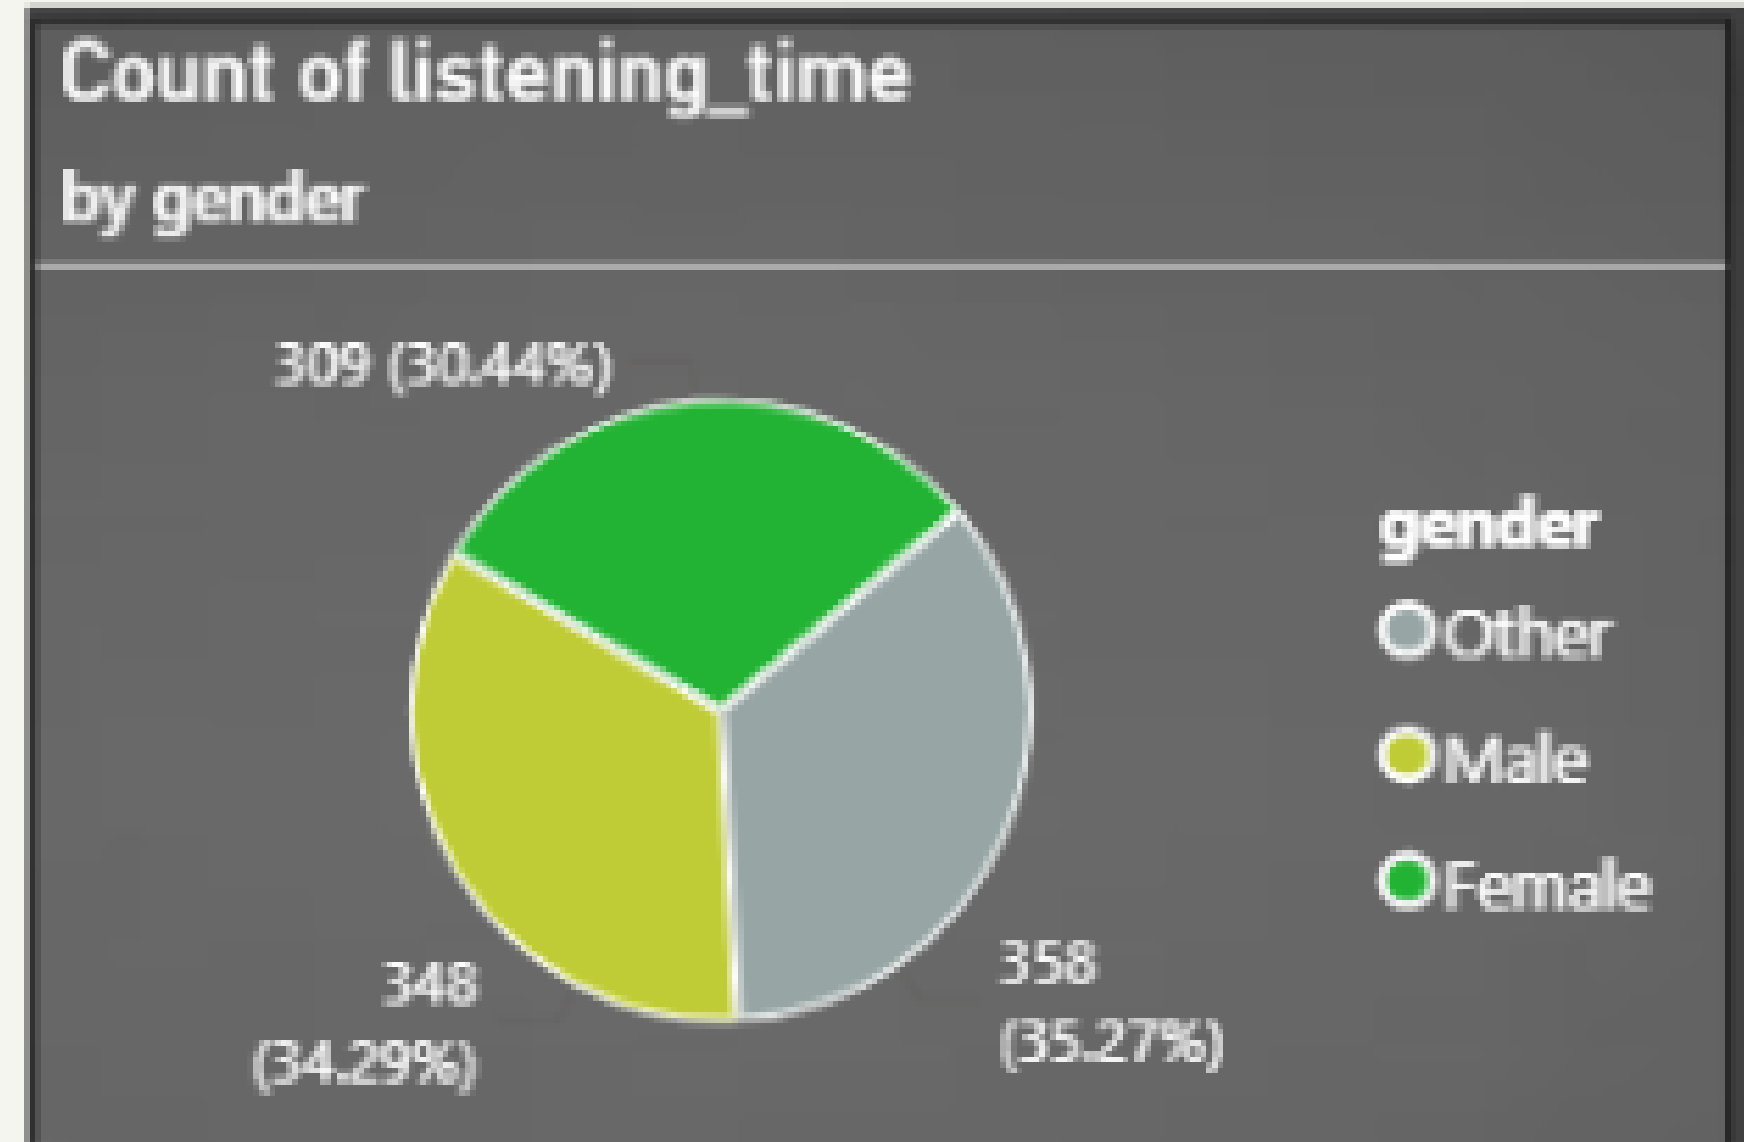

VISUALISATIONS

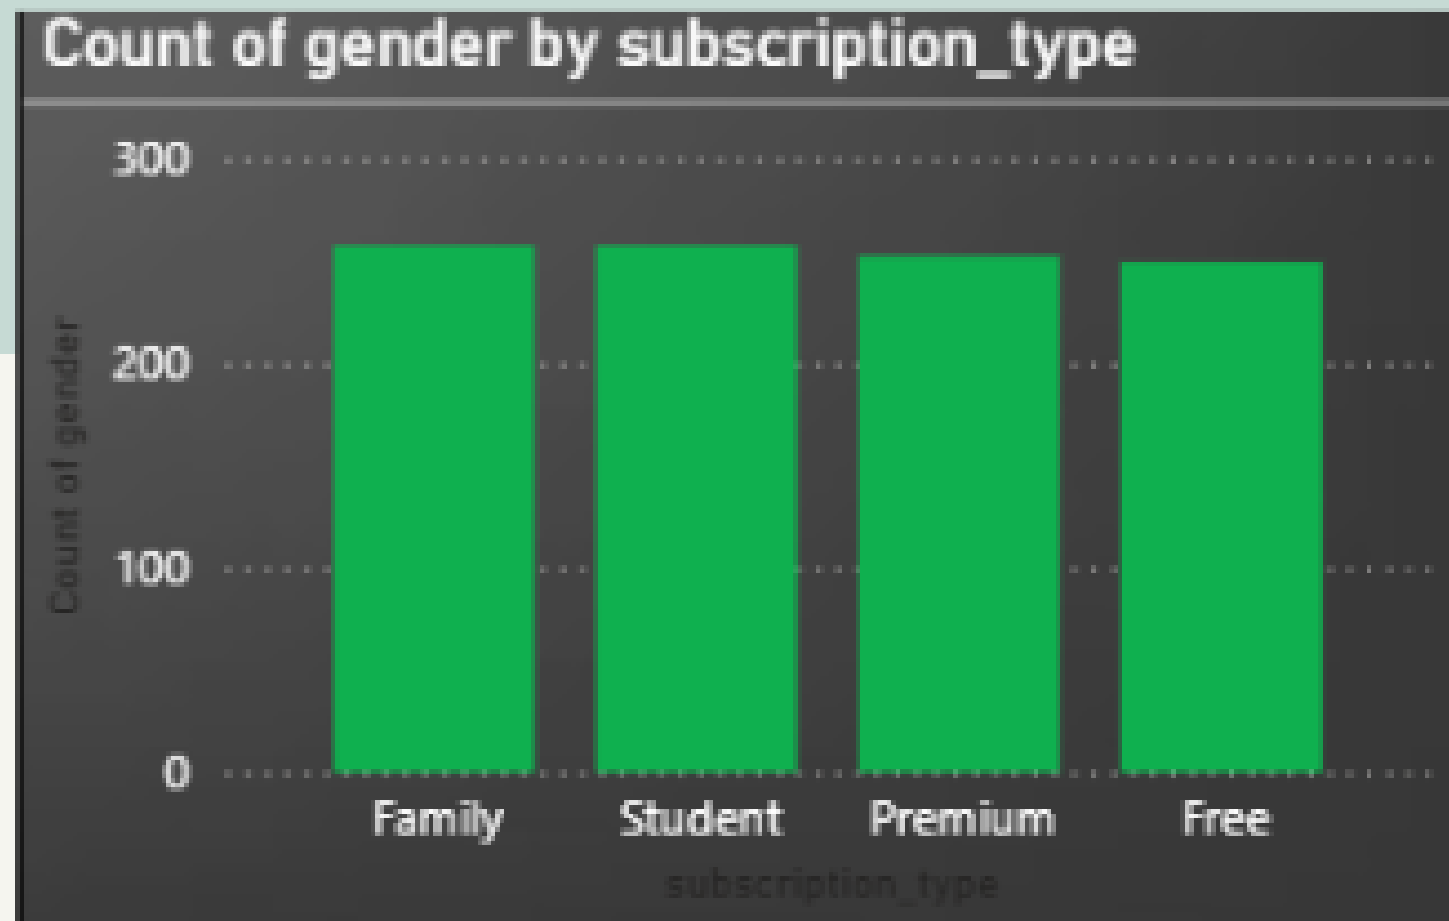

The stacked column chart shows the listening time of the users by the skip rate.

The increase in skip rate might contribute towards churn rate

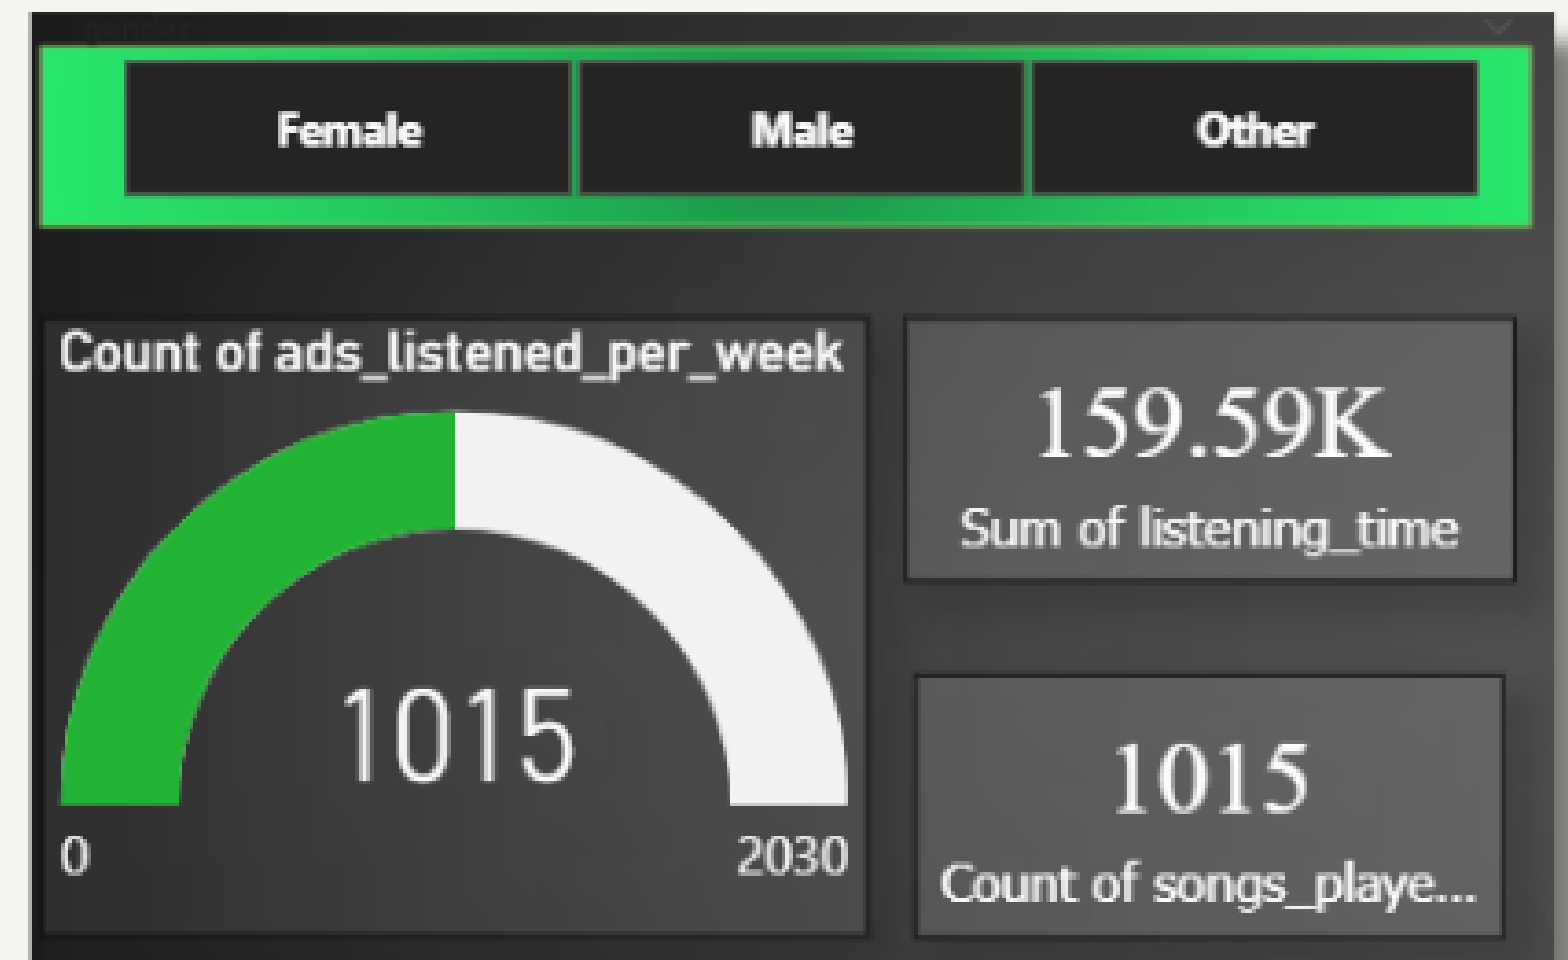

The pie chart gives the count of listening time of different genders. The user base is almost perfectly split between Male, Female, and Other (approx. 33% each).

The clustered column chart gives the subscription_type by gender

The KPI Visualisation gives the sum of listening_time, count of songs played per day & no. of ads listened per week

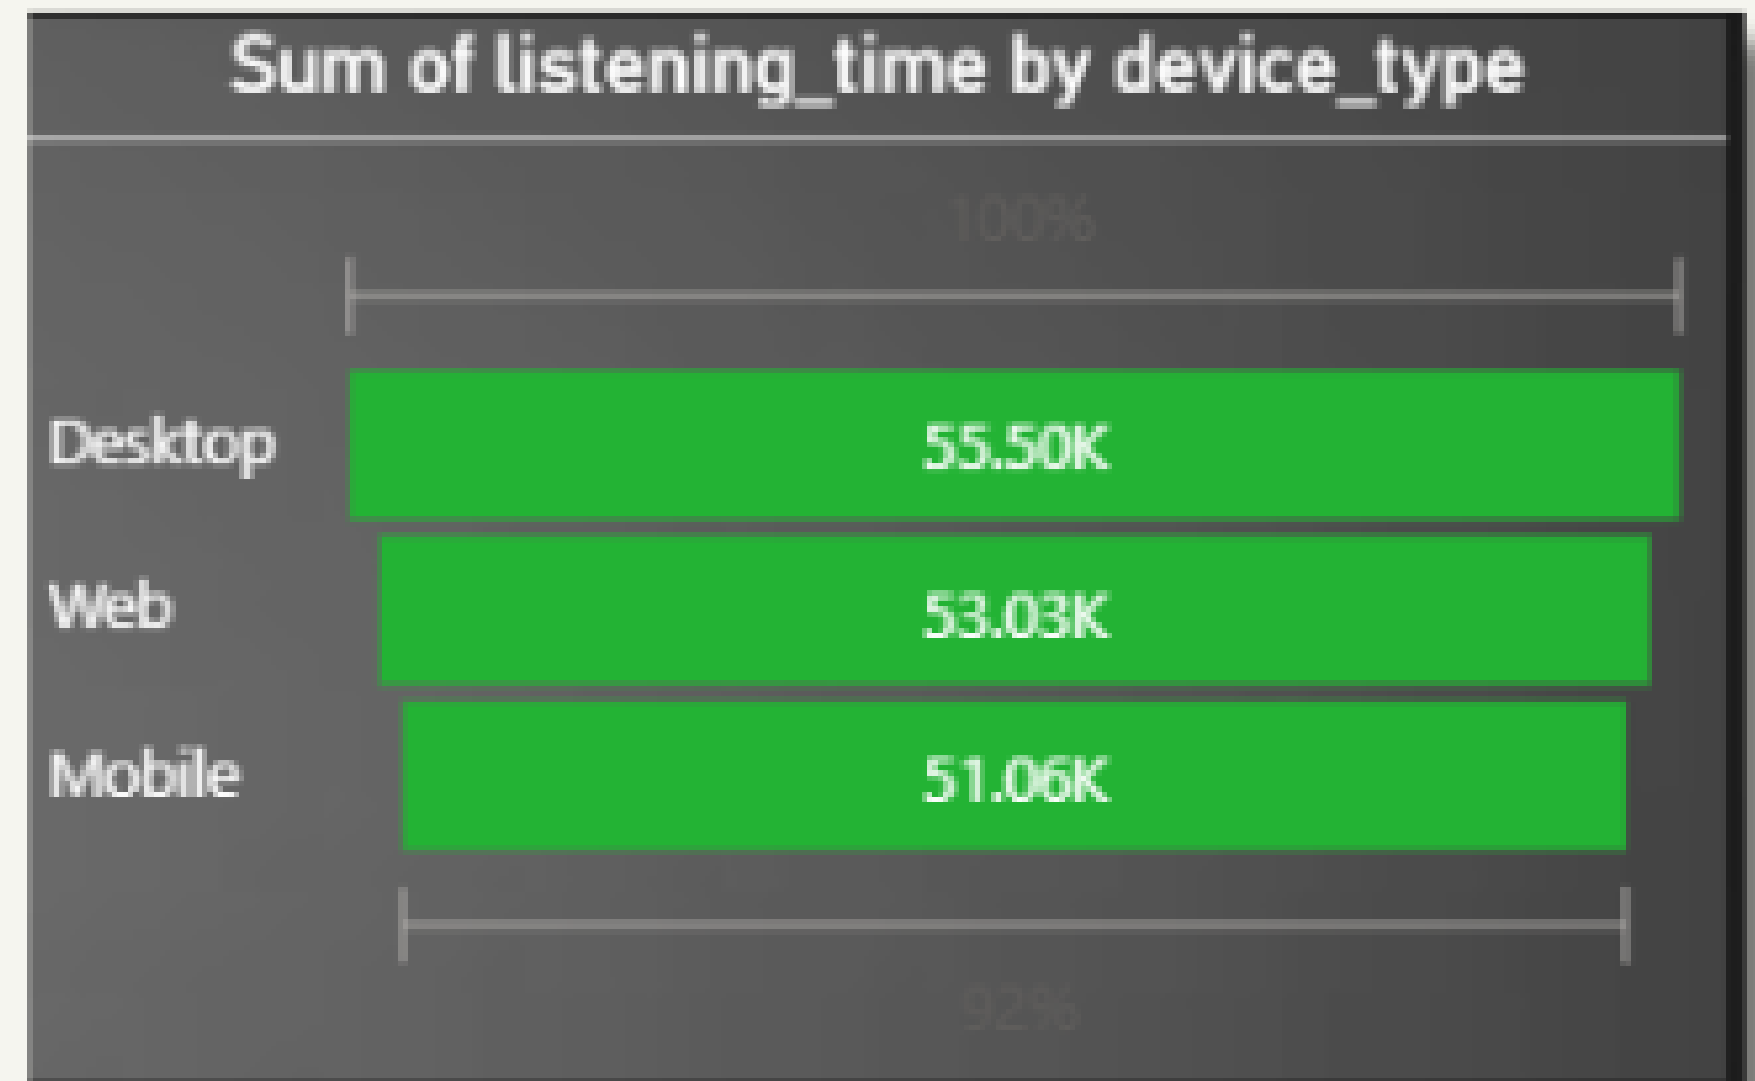

The button slicer gives the count of churn rate of each country

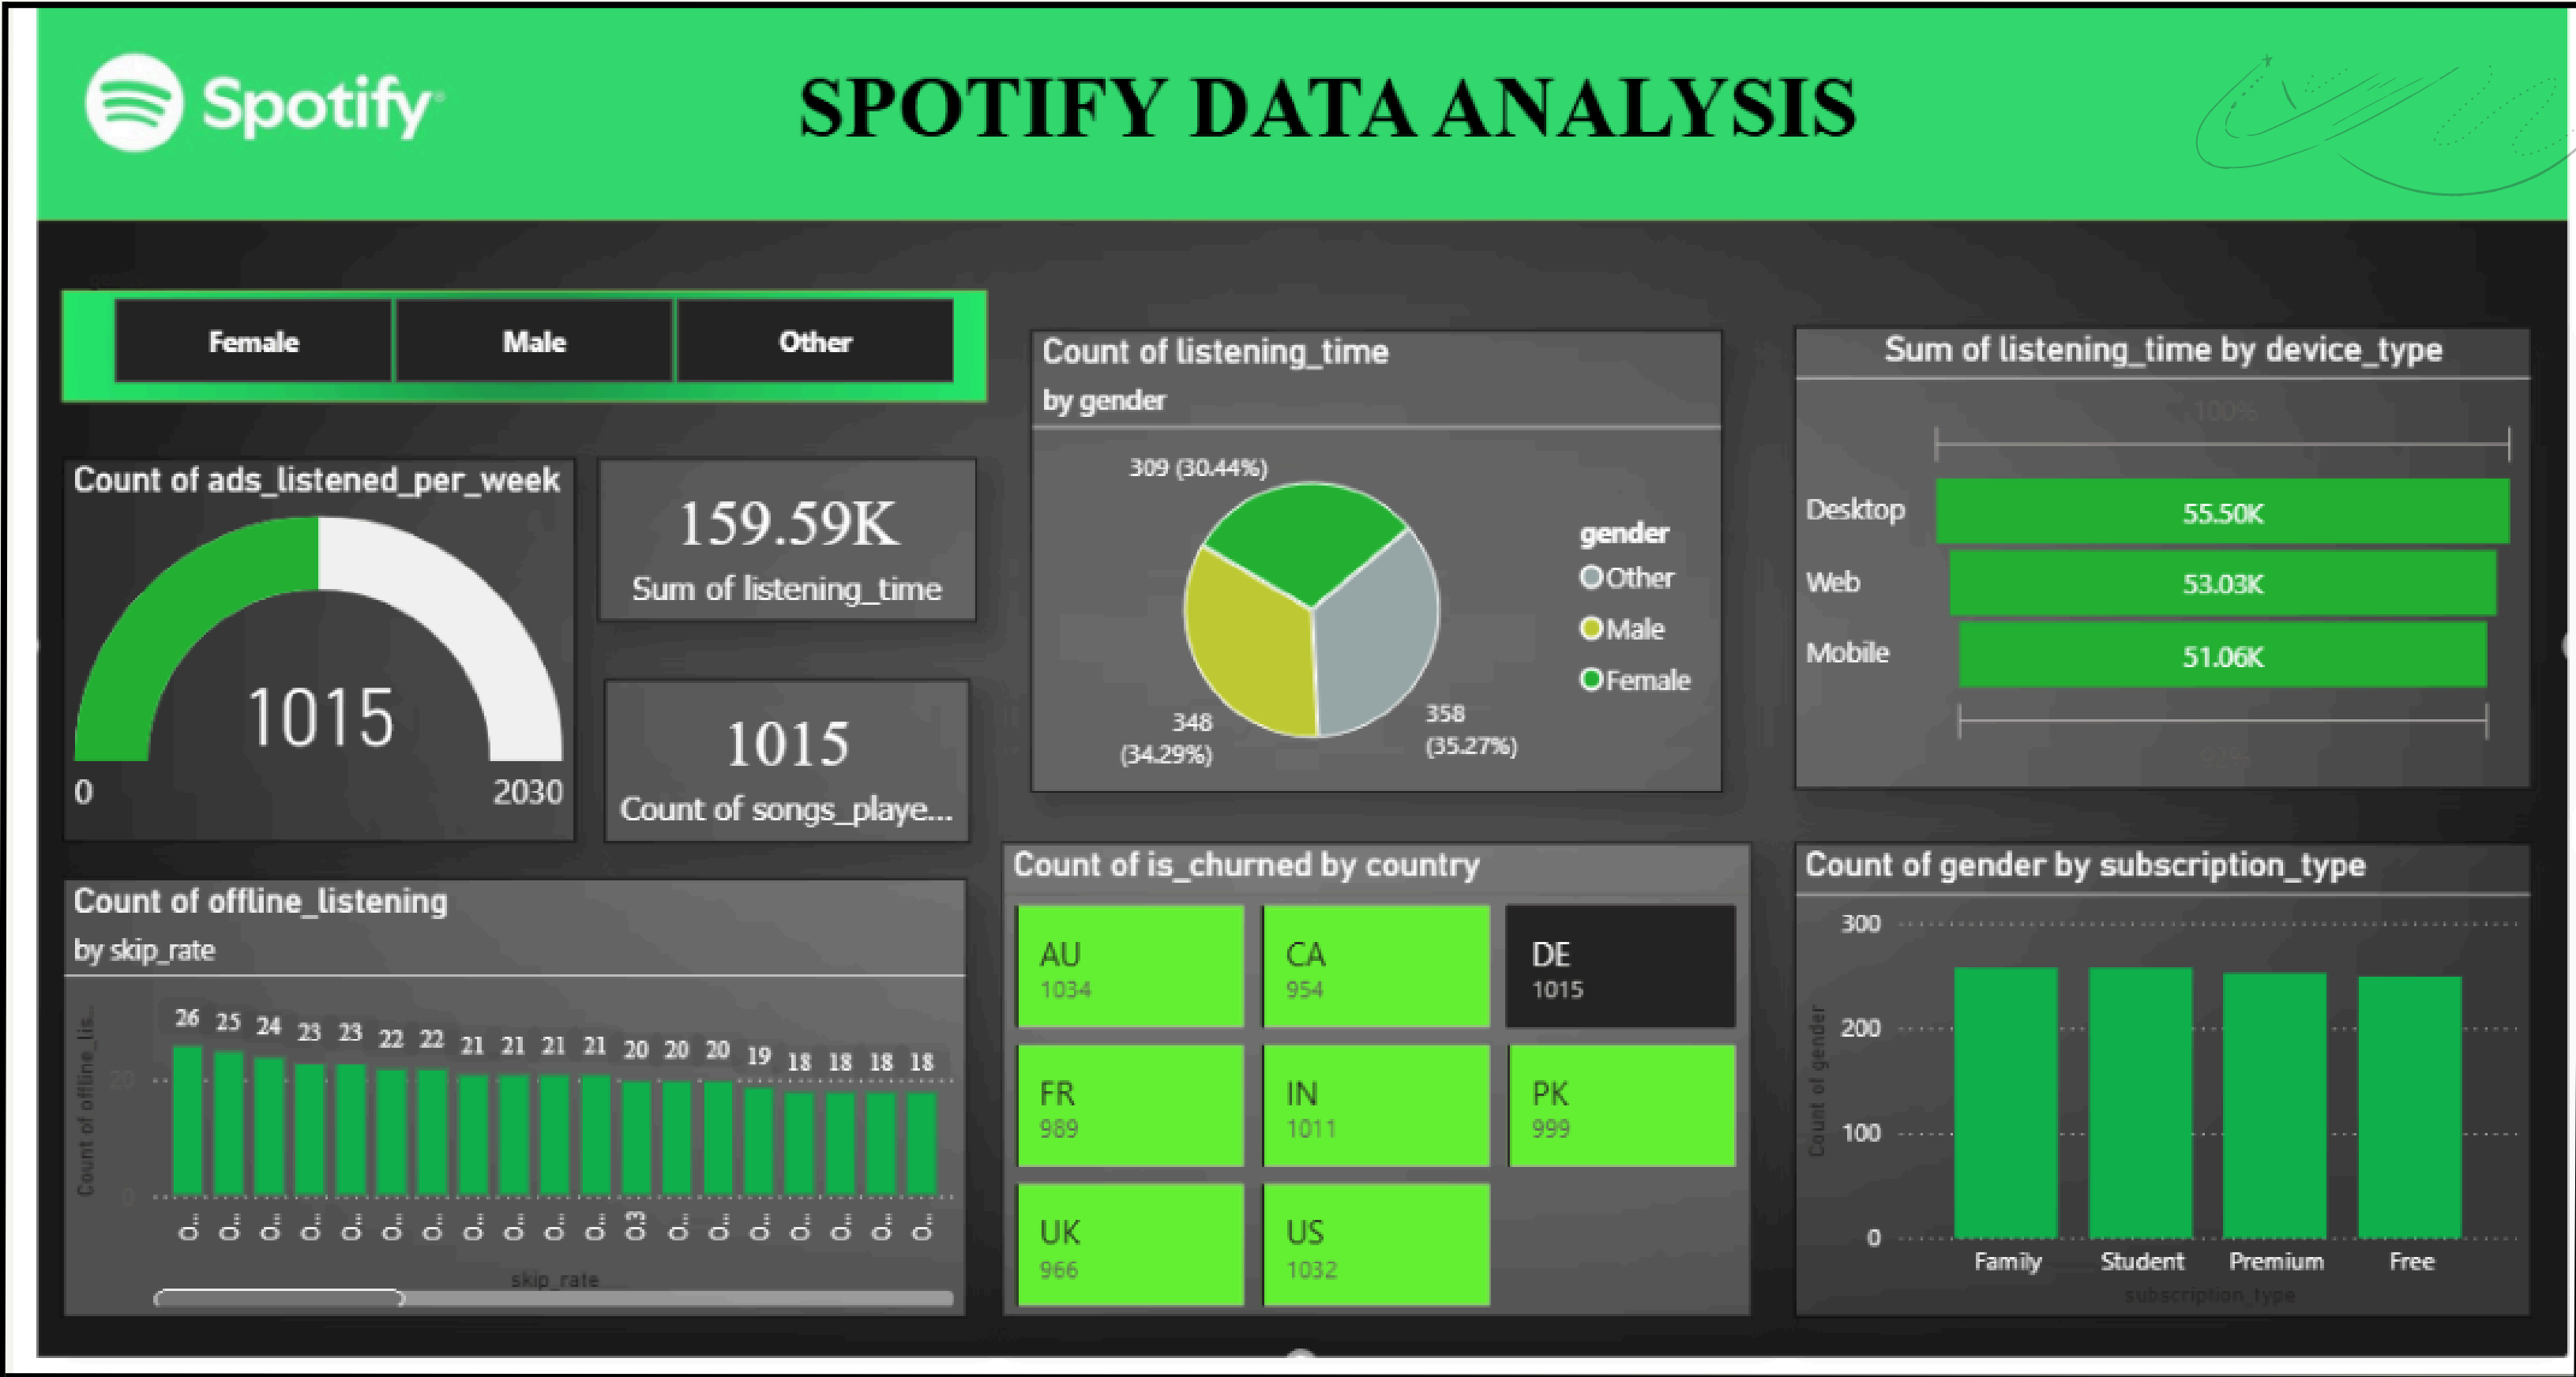

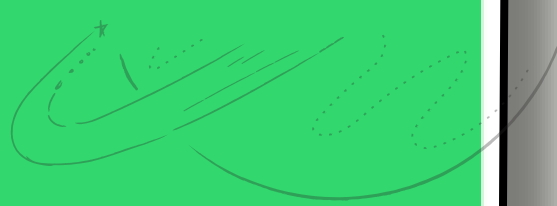

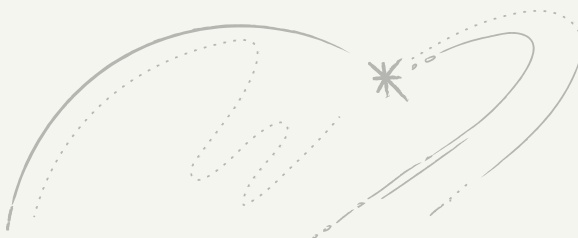

Count of is_churned by country		
AU 1034	CA 954	DE 1015
FR 989	IN 1011	PK 999
UK 966	US 1032	

The funnel chart gives the listening time by device type (desktop,web, mobile) - the device most preferred by the users.

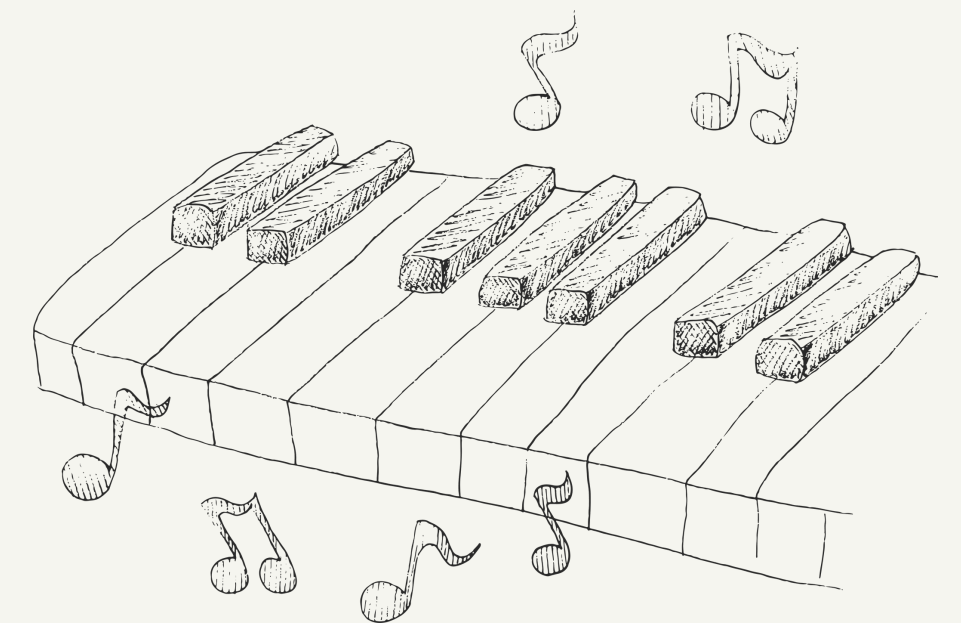

DASHBOARD

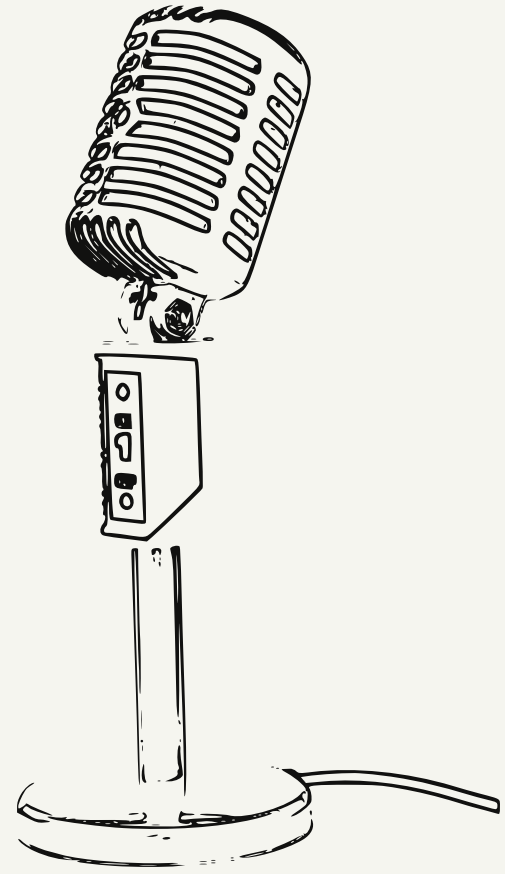

CONCLUSION

The Spotify churn dataset reveals a highly engaged global user base that spends an average of 2.5 hours daily on the platform, primarily through mobile devices. While retention is currently stable at 80%, the 19.3% churn rate highlights a critical need to address user friction, specifically evidenced by a high 25% skip rate and heavy ad loads for free users.

To sustain growth, the platform must leverage its strong "offline listening" adoption and prioritize improving song recommendation algorithms to reduce skips.
